- STEM Toy DIY Mini Vacuum Cleaner with electric motor & Fan: This STEM Educational DIY Toy includes required Materials to make working model of Vacuum Cleaner (set of batteries too), easy-to-understand, step-by-step Instruction workbook for a Scientific Approach to Problem Solving.
- Science Project Kit for School Award winning learning kits, – Awarded by IDA for our innovative, tinkering, Fun learning and STEM based learning kits and materials.
- SECRET INGREDIENTS TO BUILD YOUR OWN MINI VACUUM CLEANER BUILD APPLY LEARN – Hassle free project kit

Tinkl Art @ Home

Product Code: 371

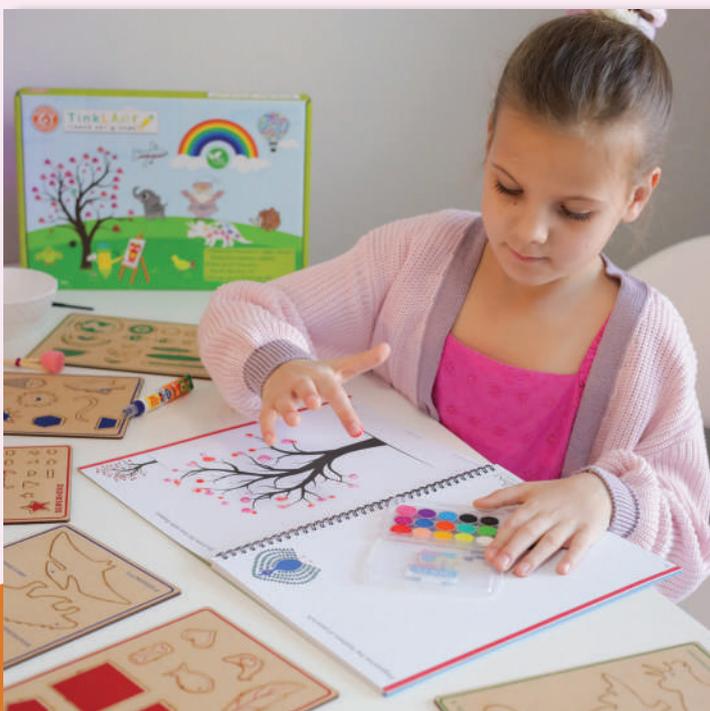

Product video

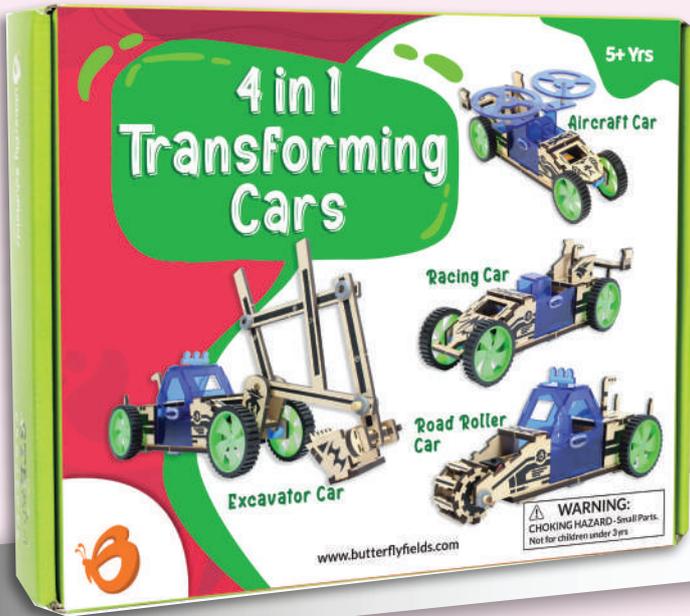

Ages 4+

MASTER CASE QTY: 20
RETAIL BOX: 51 X 43 X 38"

- STENCILS for Kids - 6 Reusable Stencils Template for Art and Craft, Scrap Booking, Wall Painting, Home Decor, Sketching, DIY Albums, Card Making and Fabric Painting. These stencils help children in drawing basic shapes to Super Heroes and dinosaurs
- FINGER PAINTING & SPONGE ART - Finger painting allows toddlers and preschoolers to dabble in this form of art as it is difficult for them to do it with a paintbrush. The great thing about painting for children is that each painting is truly a work of art to them... even if you can't tell what it is. Finger painting with children can also be a great way for them to explore their art skills by experiment, cause and effect, learn about colours and see the magic of new colours when mixed.

4in1 Transforming Cars

Product Code: 389

Product video

Ages 6+

MASTER CASE QTY: 34
RETAIL BOX: 51 X 43 X 38"

- 4in1 Electric Car Making Kit - Racing Car, Aircraft Car Excavator Car Bulldozer Car. KEEP KIDS CREATIVELY ENGAGED AT HOME: Build strong foundation for STEM-related careers. TRIGGER CURIOSITY & BUILD CREATIVE CONFIDENCE: Kids naturally want to figure out how things work.
- DEVELOPS CRITICAL THINKING & PROBLEM SOLVING: - through play challenges that allows them to think and figure things out for themselves.
- High quality: These 3D wooden parts are made of safe, pollutant-free wood with precise laser pre-cut , the edges of each component have a smooth finish can be tightly integrated, easy to assemble. All parts are made of high-quality safe and recyclable materials.

India Map Puzzle

Product Code: 365

Product video

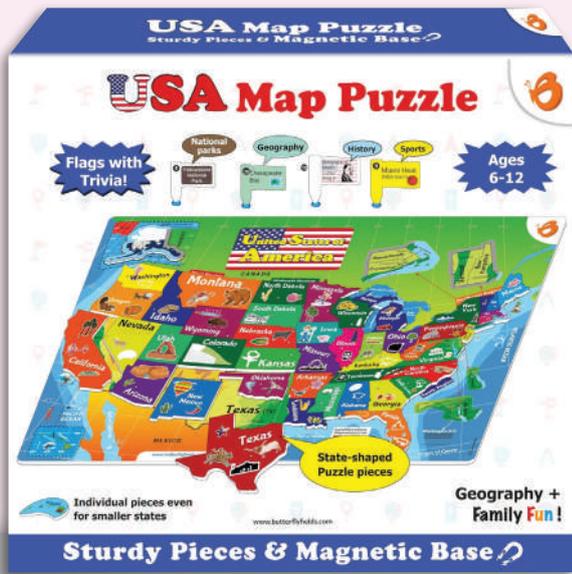

Ages 6+

**MASTER CASE QTY: 22
RETAIL BOX: 51 X 43 X 25"**

- **GEOGRAPHY MADE FUN:** A unique, fun & exciting Magnetic India map Jigsaw puzzle toy to help children learn the States of India and their Capital cities.
- **SOLVE TO LEARN LOCATION:** This learning & education toy consists of 1 Magnetic base Map, with precisely cut 25 puzzle pieces (State & Union Territories shaped) that will help the child learn the location of the States of India.
- **CONTENTS:** 1 Magnetic Base Board with Map, 25 Puzzle Pieces, 34 Flags of State Capitals, Clay (to hold flags) and 1 Instruction cum information Sheet
- **TRACE THE OUTLINE WITH STENCIL:** Once the map is ready you can rank the States as per the size using the instructions

USA Map Puzzle

Product Code: 450

Ages 6+

- Presenting the United States Magnetic Map Puzzle (dimension of 60 x 44 cm) featuring meticulously crafted puzzle pieces shaped like the 50 states. This interactive tool fosters a child's understanding of state locations through engaging play. Twice the fun with Flags and the captivating 50 states puzzle, making geography an enjoyable learning adventure.
- Elevate learning for 6-10 year-olds with a dynamic USA Map jigsaw puzzle featuring, 100 Fun Facts and 50 State Capitals and Flags. Transform your space into a vibrant playground using magnetic puzzle pieces featuring the United States map.

USA Map Puzzle with BINGO Cards

Product Code: 472

Ages 6+

- Presenting the United States Magnetic Map Puzzle (dimension of 60 x 44 cm) featuring meticulously crafted puzzle pieces shaped like the 50 states. This interactive tool fosters a child's understanding of state locations through engaging play. Twice the fun with Flags and the captivating 50 states puzzle, making geography an enjoyable learning adventure.
- Engage in lively family game nights with "GUESS THE STATE," a fast-paced card game. Utilize clues in three exciting challenge modes - Locate Me, Unjumble Me, and Who am I? - to identify states on the vibrant United States map. Be the first to complete your BINGO card for a thrilling victory. Enjoy the educational journey with Fun Flash Cards and explore the USA in a playful way!

Instruction
Videos

- Make a hydraulic jack and projectile launcher to understand.
- Relation between force, pressure and area - Pascal's law
- Force transmission in fluids (liquids and gases)
- Basics of projectile motion
- Contact & non-contact forces, Pressure exerted by liquids & gases, Application of Pascal's law - Hydraulic Jack

Satellite Stellar

Ages :8Y+

Category : STEM

SKU:299

MRP:₹500

Scan Here To
Watch
Instruction
Videos

- GPS model to understand how satellites locate planes, cars, mobile phones etc.
- Model to understand how satellite is used in communication.
- Working of Satellite communication & GPS.

Solar System - Planets and its Features

Ages:5Y+

Category :STEM

SKU:265

Scan Here To
Watch
Instruction
Videos

- Is our Earth flat or round?
- Why do we see Day & Night every day?
- How are Sun, planets & asteroid belts positioned in the solar system?
- How are Sun, planets & asteroid belts positioned in the solar system?

Mini Hydraulic Cannon

Ages: 8Y+

Category : STEM

SKU: 140

Scan Here To Watch Instruction Videos

Carry out a series of experiments to understand different properties of air:

- Air occupies space & has weight - Balloon balance
- Air can push things - Hydraulic cannon
- Air (oxygen) is needed for combustion - Water candle experiment

Electro Effects

Ages: 8Y+

Category : STEM

SKU: 152

Scan Here To Watch Instruction Videos

Make an electromagnetic crane to understand:

- Magnetic effects of Electric current - Electromagnetism
- Real life applications of Electromagnetism
- Dependence of electromagnetic strength on number of turns, batteries, material used as core.
- Make a simple electric circuit using Nichrome wire to understand about heating effects of electric current
- Heating effects of electric current - Working of a fuse & water heaters, Electromagnet, Application in electromagnetic cranes to remove metallic wastes

Different Forms of Energy

Ages: 5Y+

Category : STEM

SKU: 134

Scan Here To Watch Instruction Videos

- Make a battery operated fan to see how electrical energy can move a fan
- Move a magnet through a maze to see how magnetic energy can move things
- Build a wind mill to see how wind energy can be used to lift load using a basket

DIY SCIENCE KIT

DIY Kaleidoscope

Ages: 5Y+

Category : STEM

SKU: 167

Scan Here To Watch Instruction Videos

Make your own Kaleidoscope and understand:

- Symmetry through reflections in mirrors
- How patterns are created by multiple reflections
- Do an exercise using a plane mirror to find lines of symmetry of different shapes

Chemical Effects of Electric Current

Ages: 8Y+

Category : STEM

SKU: 251

Scan Here To Watch Instruction Videos

DIY SCIENCE KIT

Make a miniature electroplating unit to see:

- Copper deposition on iron nail.
- Real life application of electroplating

Maglev Explorer

Ages: 10Y+

Category : STEM

SKU: 132

Scan Here To Watch Instruction Videos

Test materials and categorize them into magnetic and non-magnetic material. Make a magnet float in air & understand poles of a magnet & their behaviour

Make a pencil levitation model to understand:

- Poles of a ring & solid magnets
- Application of magnets in real life - Maglev trains.

Make a Magneto Tracer that traces a metallic object using magnetic induction

Magneto Drive

Ages: 12Y+

Category : STEM

SKU:119

MRP:₹500

Scan Here To
Watch
Instruction
Videos

- Make a straight conductor and observe its magnetic effect on a compass
- Make a circular conductor and observe its magnetic effect on a compass
- Make a solenoid and find the direction of magnetic field in and around it using a compass
- Make a working model of a DC motor and understand its working

DIY SCIENCE KIT

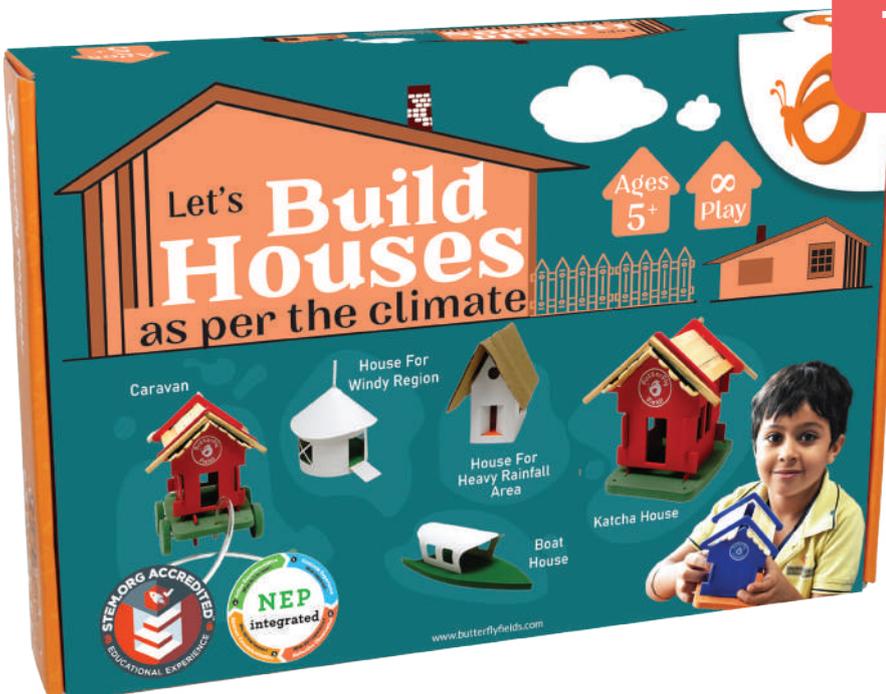

Types Of Houses
